

The Musicone

CONSOLE MODEL

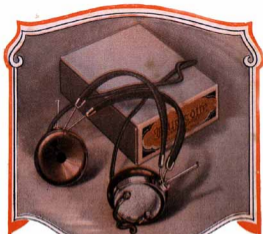

The Musicconsole has all the beauty and fidelity of tone found in the Musicone, greatly enhanced by the new tone recreation chamber. The front of this chamber

acts as a sounding board or "baffle," giving mellowness and richness to voice and instrument. The cabinet is by McLagan, with a fine walnut finish, authentic in design and proportions. All battery chargers, wires and other accessories are accommodated in the cabinet. The Musicconsole is adapted for use with any compact set, old or new.

The Musicone BALANCED HEADSET

A beautifully-made Headset. The bakelite ear-caps, the head-band and cord are finished in "English" brown. Test this headset by any standard—coil, winding, power of magnets, seating of diaphragm, light weight or *comfort*—and you'll agree it is a wonderful value. Each Musicone headset is balanced over a wide range of audio frequencies on a specially designed oscillator. Resistance:—2,000 ohms.

The Tone Re-Creator

The Musicone

THE TONE RE-CREATOR

The Musicone brings the actual artist or instrument directly to you. Its tone is so clear, lifelike and distinct that the only comparison possible is with the original itself.

The Musicone employs principles of sound recreation so fundamental that in one year only this instrument has come to be the accepted standard by which all others are judged.

The Musicone does not "shoot" sound at you—the volume and tone characteristics are the same in all directions. The cone itself is not rigid, therefore there is no vibration to cause distortion.

Although supreme in its field, the Musicone is not high in price. Its beauty of reproduction is within the reach of every radio owner.

Refined Beauty that Harmonises with any Setting

Quite small in size, slender and chaste in design, the MUSICONE will grace the most beautiful library table. Finished in a quiet, refined golden brown, it harmonises exquisitely with any furniture. Felt covering on the base protects the table top.
